

Budget Office Partition Screens

Scan our QR code to view the product Video

Your screens will be received on a wooden pallet. Remove the screens from the pallet and remove packaging.

Step 1

Lay the screen down on a table to attach the feet. Push the foot into the square holes provided. The screen can then be stood upright.

Step 2

If you have more than 1 screen and would like to attach them, use the supplied linking strip which fits down the channels on either side of the partition.
