Monitor bracket placement

Shelf and hook placements

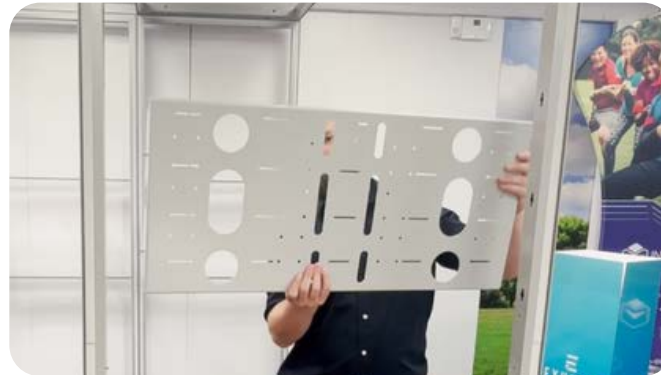

Space for monitor cables

### Step 1

On the assembled panel, remove the bracing bars by twisting toward you and removing from the accessory slots in the uprights.

### Step 2

Take the accessory bracket and slot into the uprights at the chosen height. You can use any of the accessory slots on the upright sections.

### Step 3

Once in the accessory slots, apply light pressure to ensure the attachment has dropped into the locked position.

## Exhibit Exhibition Stand - Attaching Hooks

### Step 1

From the front of the panel it's possible to feel the slots used for the hooks. Find the correct placement for your hooks before moving to step 2.

### Step 2

Make a cut through the panel with a Stanley Knife. The cuts should be inline with the slots on the accessory panel behind the graphic.

### Step 3

Push the hooks through the printed panel and accessory panel to secure in place.
