Monitor bracket placement

Shelf and hook placements

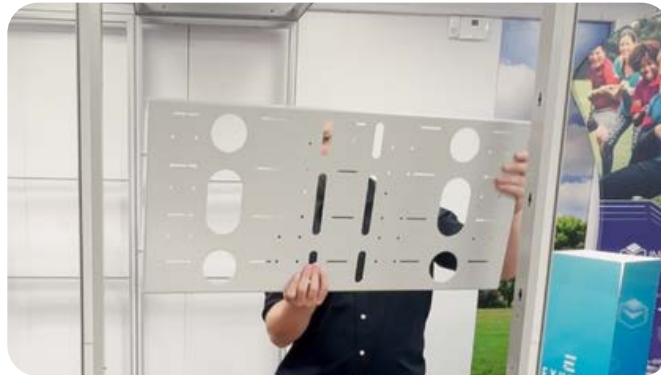

Space for monitor cables

### Step 1

On the assembled panel, remove the bracing bars by twisting toward you and removing from the accessory slots in the uprights.

### Step 2

Take the accessory bracket and slot into the uprights at the chosen height. You can use any of the accessory slots on the upright sections.

### Step 3

Once in the accessory slots, apply light pressure to ensure the attachment has dropped into the locked position.

## Exhibit Exhibition Stand - Attaching Shelves

### Step 1

From the front of the panel it's possible to feel the shelf slots. Find the correct placement for your shelf before moving to step 2.

### Step 2

Cut through the 2 chosen slots, 1 on either side, this is where the brackets will sit.

### Step 3

Push the brackets through the printed panel and accessory panel to secure in place.

### Step 4

Place the shelf on to the brackets and your shelf is complete.
