

Linx Display Board

Scan our QR code to
view the full
assembly video

You'll receive loop
nylon panels, poles
and circular bases.

Step 1

Take 1 base and pole and screw
the pole into the base until tight
and secure.
Complete for both poles & bases.

Step 2

Lay the pole down and slide 1 clip
down each pole, right down to
the base.

Step 3

Fix 1 clip to the top of each pole with
the screw located at the side.
This will secure the clip at this height.

Step 4

Place the bottom of the board into one of clips which is sitting at the base. Slide the board up the pole with the bottom fitting.

Step 5

Slide the board up to the top and slot the top clip into the top of the display board.

Step 6

Once the board is sat in both clips, tighten the bottom clip on to the pole with the screw hidden in the side.

Step 7

Repeat the process to ensure all 4 clips have been clipped into the board and the screws have been tightened to the pole.
