Remove packaging from the folding panels and stand upright with the wheels on a flat surface.

Step 1

Hold the end panel and gently pull outward to unfold all the panels.

Step 2

When unfolded, fit the stabilising feet by slotting on the frame and tightening in place.

Any 6 or more panel Mobi Room Divider will include an additional central stability foot.

When storing, make sure you're folding the panels the right way to prevent any damage.
