

## Rockport Exhibition Counter

Scan our QR code to view the full assembly video

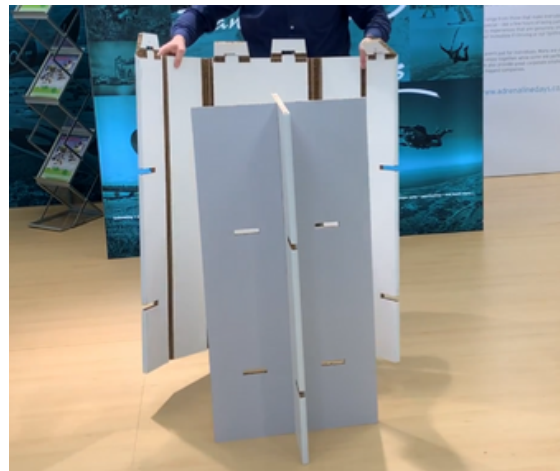

You'll receive front/side panel, internal inserts, counter top and x2 shelves.

### Step 1

Take the internal inserts and slot the smaller insert in to the larger insert, using the designated central slots.

### Step 2

Once the central structure has been made, take the front/side panel and wrap around the central structure.

### Step 3

Take 1 of the shelves, and line up with the 2 outer panels and central insert. The cut outs will line up allowing you to push the shelf into position.

## Step 4

Repeat the same process with the top shelf and slot into position.

## Step 5

To complete the Rockport Counter, attach the counter top to the tabs which are pointing up right.

## Step 6

Finally, secure the top with the supplied screws. You'll find a folded tab located on the left and right side.
