## Desktop Sneeze Screens

**N/A**
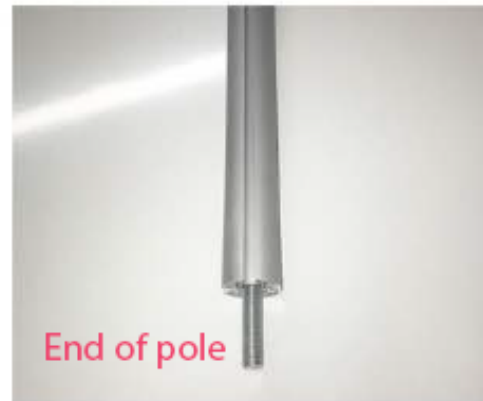

**Scan our QR code to view the product Video**

You'll receive x2 poles, x2 washers (2 for each side) & x2 bolts.

End of pole

**Step 1**
Before drilling, mark the position of the poles and drill point.
Drill through your marked area and add x1 washer to the top of the desk.

**Step 2**
Thread the end of the pole through the washer and drilled hole within the desktop.

### Step 3
Once you have the end of the pole showing through the under side of the desk, place the washer followed by the bolt and fasten until tight.

### Step 4
Take a corner fitting and drop down the channel section on the pole, secure with a screw driver. Add Sneeze panel and position on top of the corner fittings.

### Step 5
Insert the top corner moulding. Secure into position with a screwdriver.
