

Streamline Monitor Stand

Scan our QR code to view the full assembly video

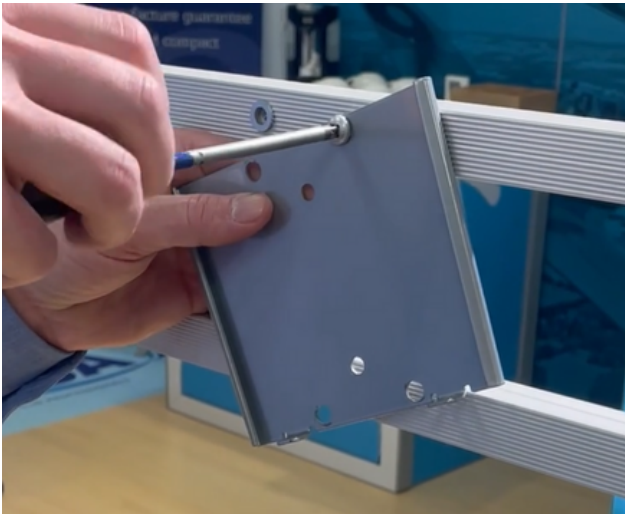

Step 1
Attach the provided Vesa plate onto the back of your TV Monitor with the screws and washers.

Step 2
On to your already assembled poles, take 1 spacer and screw and put through the designated hole at the base of the pole and tighten the silver brace between 2 poles.

Step 3
Repeat the process on 2 more braces which have 2 holes mid way through the bar. These should be front facing and positioned above half way up the pole.

Step 4

Fix the second bracket directly onto the braces located toward the top of the poles. Secure in place with x4 screws.

Step 5

Add the TV on to the braces with the fitted bracket. Slot the bracket on the TV down over the bracket attached to the stand. This will lock the plates together for a secure hold.
